

Is your class planning a field trip, athletic play day, or special fund raising event?

**Bindics Screen Printing** will visit elementary classrooms with a portable table top printer, provide a demonstration and an educational overview on the art of screen printing, and assist each child with printing his/her own individual T-shirt.

Matching shirts help to keep students safely grouped together for easy identification while on field trips or attending special events.

Colorful shirts provide team spirit for sporting activities and athletic play days.

**Call for an order form or visit our Web site to download a form. We are happy to fulfill other orders not available through this on-site printing program. Call for prices and information.**

For more than 20 years, **Bindics Custom Screen Printing** has been serving schools, community organizations, and businesses in the Lehigh Valley and surrounding areas.

Chamber of Commerce.

#### **On-Site Program Specifications:**

Create your own design or have **Bindics Screen Printing** prepare artwork for you (one design per grade; front only with black ink.)

Reserve your classroom date at least two weeks in advance to allow for preparing artwork, ordering shirts and notifying students' families.

Order the same shirt color for the entire grade, or different colors for each class or team. (Select a light or bright color, as black ink does not show well on dark shirts.)

Allow 20-30 minutes per class for the printing session.

A 3 ft. flat table area is needed for printing in the classroom, and of a reasonable height for students to reach comfortably.

Shirts need to air dry for 72 hours before students may take them home. Each student must provide a clothes hanger for his/her shirt. Teachers should prepare to label each student's shirt with their name (masking tape is suggested) and make arrangements for hanging shirts to dry in the classroom.

One free T-shirt per class will be provided for the teacher.

Need ideas? Visit our Web site at [www.BindicsScreenPrinting.com](http://www.BindicsScreenPrinting.com) to select T-shirt styles and colors. (Choose from youth colors only.)

We use major brand, quality shirts made of 100% cotton or 50/50 fabric.

Parents are also welcome to purchase shirts (teachers should include additions when ordering.)

A water-based ink is used for easy and safe clean-up with soap and water. (Materials Safety Data is available upon request.)

#### **Cost of On-Site Printing Program:**

\$6.00 per shirt payable by each student/person on the scheduled day of printing.

This program requires a minimum participation of three classes per grade scheduled on the same day.
